The movements that happen in feets.lbn file are listed below:

1. The person is standing in normal position.
2. Feets:- Toes totally apart with heels touching each other and knees bent. (Maybe similar to how a penguin or Charlie Chaplin stands) .
3. A jump in the air with the feet clapping each other and then landing in the same position as step 2.
4. Now Person 1 puts right leg to the side. Low and slightly off the ground. Simultaneously, person 2 puts right leg to right side. Low but touching the ground with his toes.
5. The first person puts his right leg to the side but with the whole foot touchig the ground. Simultaneously, person 2 puts right leg to right side. Low but touching the ground with his heel.
6. Both return to normal position and then jump in the same position with legs bent.
7. The movements after this are leaps for person 1 and hops for person 2. The right leg of person 2 keeps moving from right-side-low to left-side-low-diagonally.
